you can puke grenades, you poop everytime you jump, you have lazer eyes. and my kid loves it.. This game is nothing more than a hipster version of a drag and drop programming interface. This game is probably someone's intro to programming homework.. I love this game. It's perfect for releasing the angry within yourself, from blowing Gorillas to men in black up, you just can't go wrong with this game, the only issues I have is that it not fully controller support yet.. As mentioned in the earlier reviews, the game is blurry and stats take the whole screen. I had to take the advice from the reviewers. For anyone who still decide to take a chance and encounter the same problem, I recommend to ask for refund at help.steampowered.com. Remember that you can ask for refund within 14 days of purchase if the game has been played for LESS than 2 hours!. There is something wrong with this game. when I opened it it was very blurry and the health, food, and drink bars were 10 times their normal size. but this is still a good game.. idk what I was expecting

the health eat and drink bars covered my whole screen! Not recommended.. Kittens = Yes

Poop = Yes

Killing = Maybe?

Destruction = Yes

Spiders = Yes. Game controls are terrible/barely playable. Graphics are of a poor quality. Basically, it's a game of "run around as a cat destroying all the generic Unity3d resources". Fun for a couple minutes, max. Mouse look might make it bearable, but as it is, virtually unplayable and not all that fun when played.. It is laggy and the health, and other stats take up the whole screen! The front page is blurry too! This is stupid. The trailers amazing but the game SUCKS. IT's like F*ck. Tis game is made out of Crap and\u2665\u2665\u2665\u2665\u2665. i bought the game but the graphics is very poor.... If you know DanTDM he made a video on it.

You should be careful when you buy this, because sometimes if you don't have the right hardware it might be blurry.

When I bought it and tried it out it was blurry.

So you should be careful.. I would recommend this but the developers haven't fixed a problem for me and others (that I you can fix like I did).It makes the game screen blurry and also the developers have done nothing about it. I am giving this a thumbs down because they are not fixing a simple problem because they are too lazy to!
